CarSim is used extensively by 7 of the 10 largest automotive OEMs. OEM users consistently find close agreement between CarSim predictions and test results. CarSim works as a standalone application; it does not require any other software to perform simulations.

CarSim Overview

- CarSim reads all input from text files

Read Online Carsim Manual

that are normally generated automatically by the Browser/GUI. These files can also be made externally for advanced applications.

- Input files for CarSim follow a simple keyword-based format called the Parsfile.

CarSim can recognize thousands of keywords when processing input files.
